CAREER OBJECTIVE

Aspiring .NET Developer with knowledge in C#, ASP.NET Core, .NET Framework, and ReactJS frontend development. Passionate about building responsive web applications, learning modern technologies, and improving problem-solving skills. Looking for an opportunity to contribute to software development projects while enhancing technical expertise.

EXPERIENCE

Software Developer

Risolutor Technologies

Sep 2025 - May 2026

PROJECTS

EMPLOYEE MANAGEMENT SYSTEM

Technologies Used: C#, ASP.NET Core, SQL Server

Developed a web application to manage employee records efficiently.

Implemented CRUD operations for employee details.

Connected application with SQL database using Entity Framework.

Built responsive pages and optimized backend functionality

MONITORING APPLICATION

Technologies Used: C#, .NET Framework, ASP.NET Core, MySQL Server

Developed a multi-component monitoring system with installer, admin, monitor, network, and updater modules.

Monitored system resources including RAM, disk, network usage, active time, idle time, and top applications.

Implemented screenshot capture, keypress detection, hardware event monitoring, and automated email alerts.

Supported silent installation, live streaming, secure uninstallation with password, and auto version updates.

TASK MANAGEMENT

Technologies Used: AngularJs, JavaScript, HTML, CSS .

Architected a dynamic frontend task management dashboard using React hooks for robust state isolation.

Implemented data persistence via localStorage APIs, enabling session state management across page refreshes.

Engineered real-time search and multi-factor filtering based on task priority and completion status.

Built a modal overlay with form validation, animated micro-interactions, and status alert feedback.

SKILLS

- C# Programming
- .NET Framework
- Entity Framework
- SQL, MySQL
- HTML, CSS,
- Bootstrap
- JavaScript, ReactJS, Angular (Basic)

EDUCATION

Bachelor of Engineering in Computer Science

Sardar Raja College Of Engineering

2021-2025

CGPA:7.9
